

COLOMBO 18 OIL

Technical Informations

WHAT IS IT

Il FILTRO COLOMBO® FILTRO PULCINO® è costituito dalla speciale elettropompa e da un sistema filtrante denominato sistema liquido a strati pressati. Questo particolare tipo di filtraggio permette di ottenere ottimi livelli di purificazione dell' olio di oliva, senza alterare le caratteristiche fondamentali; per questo è particolarmente apprezzato per filtri domestici, ma anche nel settore professionale.

HOW WORKS

The liquid ring pump obtains the suction capacity by simply filling the pump body through one of the hose holders. the suction capacity is active on both directions of rotation.

WHAT LIQUIDS CAN HANDLE

It is possible to use the filter for the clarification of olive oil and all vegetable oils in general.

SERVICE

Normal maintenance requires few and simple interventions, as if it were a normal household appliance. After use, pour clean water to rinse the internal surfaces of the pump. The electric motor requires no maintenance, there are no parts to lubricate. The external parts must be cleaned with a slightly damp sponge, and then dried immediately with a cloth.
